I'm going to revise the drawing... (again, *sigh*). The new helical will be about .469 in length. That is the next shorter size. MS21209F5-15. Do you see any issues with the helical being too short?

I would get a shorter one, there is nothing holding that last "coil" in place so the pitch of the thread may be off making it harder to screw in the bolt.

Hey JL,

I talked with Joe, he mocked up this assy based off of the EC135 CCK design I believe. I don't see why the helicoil should stick out of the top of the base bracket. We probably want to go ahead and get a smaller one unless you don't see anything wrong with having it stick out a little bit.

Hi Guys,
Any News on this?

Subject: 650.9201 Helicoil Lenght

Hi Jordon/Pablo,

We have been assembling the new 650.9201 with Helicoils and noticed that there is one coil sticking out once fully inserted, as the overall height of the part is .57" and the insert called up is .625" long. But in the ISO view on the dwg it shows the insert sticking out(see below), I don't know if this was intended or should we revise the helical insert to a shorter one?

Pls advise,

THX

JL
